Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boebel et al (US Patent 5,454,834) in view of Linhares et al (US Patent 6,030,377), Hastings (US Patent 5,330,530) and Dereume et al (US Patent 5,639,278). Surgical sutures made of gold are known in the art. The patent to Linhares et al, Hastings and Dereume et al suggest gold sutures. The patent to Boebel et al teaches the well-known method steps of suturing a laceration. It would have been obvious to one having ordinary skill in the art to provide Boebel et al with a gold suture to close a laceration because gold has minimum side effect and is an excellent radiopaque marker.

Concerning claim 8, since gold is readily used as a radiopaque marker, it would have been obvious to provide a bioabsorbable suture in combination with gold. Also, braided, sutures are well known in the art. It would have been to suture the laceration of Boebel et al with a braided and partially bioabsorbable suture.

In regards to claims 9-17, claim 1 is a directed a method claim, claims 9-17 are directed to the suture per se that does not affect the method steps. Applicant has not shown any criticality to the various claimed sutures. It would have been within the

Art Unit: 3731

purview to utilize many variations of the gold suture to close the laceration of Boebel et al.
